

We are moving the whole town!

B

How do you move a whole town? At the end of the 19th century, this area had grown into what was called “The Klondyke of Sweden”, and pretty soon it was discovered that the newly built town of Malmberget was standing on unstable ground because of the intense mining for iron ore. Since then Malmberget has constantly been changing. At 2004 a final decision was made. The whole town had to go!

Join me on a guided tour through the remnants of what was once a flourishing mining community and into the future. With historic buildings being moved and whole new neighborhoods being created.

*Time required 2 -2,5 hour

*Meetingplace Tourist center/Railway station

*Price 485 Skr/person

The price includes: Guided tour with personal guide and car/bus.

*Minimum 3 x 485 Skr
